

PIZZA[®] BAG

HEATED DELIVERY BAGS
PIZZA BAG
MADE IN GERMANY

Delivering a smile

with Heated Delivery
Bags Made in Germany!

Exclusively compatible with the battery of the eBikes from Ebike4Delivery. Consistently deliver hot food - from your restaurant to your customer's doorstep. No matter how long the ride.

Magnetic Closure

Load and unload your PizzaBag Pro with one hand and in record time. The magnetic closure makes it possible. Quickly, elegantly and without wear and tear. Your drivers save time, both at the customer's and in the restaurant. This way, you optimize your daily delivery routine and save money! In addition, the magnetic closure contributes significantly to the long durability of the bag, as there is no Velcro fastener that can wear out.

Active Heating

Two permanently installed heating elements reliably heat your PizzaBag Pro via the 12V connection of your car or eBike from Ebike4Delivery. So your food stays hot and fresh even after long journeys! With the help of the optionally available power supply unit, you can also preheat the bag in the restaurant to maintain the heat chain permanently.

High-tech Design through Magnetic Plug

Our revolutionary magnetic connector is the only one of its kind in the world on a transport bag. Your drivers will benefit from easy handling and you will benefit from more efficient operation of your delivery service.
